

PROJECT SETUP

1. Python installation

For windows - <https://www.python.org/downloads/windows/>

For Ubuntu - <https://www.python.org/downloads/source/>

2. Install following libraries

```
pip install numpy
```

```
pip install pickle  
pip install pandas  
pip install evalml  
pip install sklearn  
pip install tkinter
```

3. After this run make sure that both python file and pickle file are in the same folder
4. Run python file by double clicking on it or you can run it by command
 - python username.py
